

The Dynamic Technologies group offers a diverse range of technology solutions, digital services and related core competencies, made available through our group companies.

“If you can dream it, we can do it.”

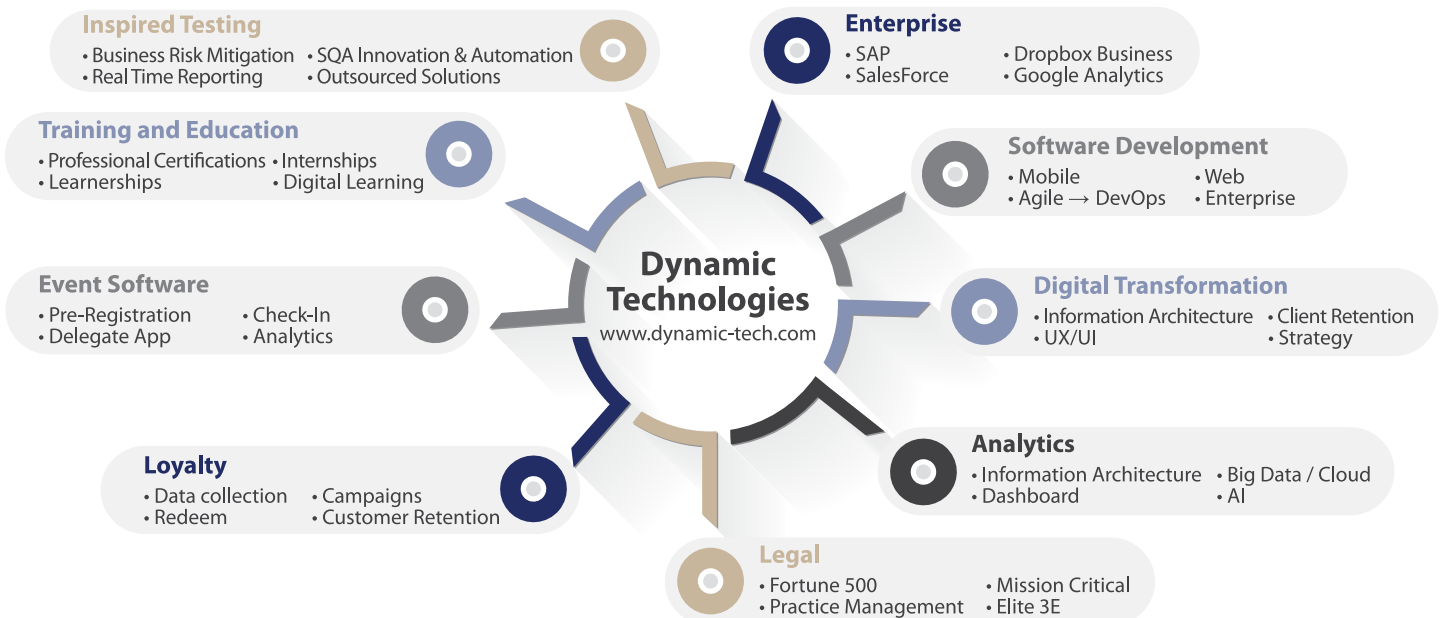

We are DYNAMIC [our vision]

Established in 1999, our evolution from a start-up with two founders to a group over 1 000 staff strong has been realised through a strategy of acquisitive and organic growth, utilising a model that retains the original structure of incoming firms. Each group company has access to a range of shared business services, finance and staffing solutions, while cross-purpose value allows group companies to leverage growth from one another. In this way, we build companies, develop people and provide our customers with new areas of technological expertise.

We are DIGITAL [our technology]

Our group is big enough to offer capacity and scale, but still able to provide a boutique solution.

Competencies | Services | Solutions

Sectors: Insurance, Banking, Financial Services, Media, Retail, Telecommunications, Mining, Manufacturing

Our Flexible Engagement Model

We are DIVERSE [our creativity]

It is due to the quality of people in our business that we are able to talk about our growth trajectory.

We not only have some of the brightest minds working within our group companies – our strength also comes from the diversity of our people. Dynamic Technologies is committed to a culture of inclusion in our business practices, relationships and attitudes, to create a diverse workplace where the art of the possible just happens.

SMARTER. DIVERSE. TECHNOLOGY
